## **ACTION TAKEN**

### **PUBLIC NOTICE OF MEETING**

Take notice that a regular meeting of the City Council of the City of Alamo Heights, Texas will be held on Monday, the 23<sup>rd</sup> day of June, 2008, in the Council Chambers, 6120 Broadway at **5:30 p.m.** to consider and act upon any lawful subjects which may come before it.

1. Approval of Minutes:

- a. Special Meeting/Work Session – June 9, 2008 **APPROVED**
- b. City Council Meeting - June 9, 2008 **APPROVED as amended**

2. City Manager's Report

- City Manager Rebecca Waldman stated that item #5 was pulled from the agenda that evening. As discussed during the City Council's earlier work session, an item will be added to the FY08 Strategic Action Plan to "Explore options to address employee concerns regarding high fuel costs." The issue of modified work hours will be considered as part of a broader discussion regarding employee compensation/benefits and energy conservation. The item will be referred to the Accountability and Management Committee and reviewed by City Council, possibly during the budget process.
- Ms. Waldman clarified two reporting errors that appeared in an article in the June 19, 2008 edition of the North San Antonio Times. Ms. Waldman noted that, first, during the June 9, 2008 work session, staff discussed a 20-year street maintenance plan, not a 20-year water conservation plan. Second, only the transfer of the city's sewer system to SAWS has been discussed, not the city's water system. Ms. Waldman stressed there has never been discussion of transferring or selling the city's water system to SAWS. An email blast clarifying the information was sent last Friday.
- Ms. Waldman asked Public Works Director Shawn Eddy to explain the declaration made by the Edwards Aquifer Authority (EAA) and its impact to the city. Mr. Eddy informed Council that although the EAA has declared Stage I Water Restrictions, no water restrictions will be implemented in the City of Alamo Heights at this time. Mr. Eddy explained that City Code specifies that Stage I Water Restrictions is to be implemented when the aquifer drops to 650 feet. A notice will be sent via email blast on Tuesday.
